

Atmospheric Vent High Input Residential Gas Water Heater

Features

- Defender Safety System®**—Designed to be the safest & most reliable flammable vapor ignition resistant system in the industry with a proven track record since 2003. Featuring an advanced ScreenLok® technology flame arrestor design, resettable thermal switch, sight window, and designed to be maintenance-free.
- Bradford White ICON System®*—Intelligent gas control with no need for
 external electricity. Proprietary algorithms provide tighter temperature differential
 and consistent water temperature levels up to 160°F (71°C). LED light indicates
 operation status/service required.
- Vitraglas® Lining with Microban®—An exclusively engineered enamel
 formula that provides superior tank protection from the corrosive effects of
 water; and with Microban® antimicrobial product protection to help prevent
 the growth of bacteria, mold and mildew on the surface of the tank lining.
- Hydrojet® Total Performance System—Sediment reducing device that also increases first hour rating of hot water while minimizing temperature build-up in tank.

Additional Details

- Water Connections—Factory-installed true dielectric waterways extend water heater life and simplify water line connections.
- **Hand Hole Cleanout**—Allows inspection of tank interior and facilitates the removal of sediment deposits (RG2100H6N models only).
- Protective Anode Rod—Provides added protection against corrosion for long-term, trouble-free service.
- T&P Relief Valve—Installed.
- Low Restrictive Brass Drain Valve—Durable tamper proof design.
- Thermostatic Mixing Valve (ASSE Approved)—Included with RG255H6N only.
- NOx Emissions—Less than 40 ng/J.

^{*}May vary by region.

^{**}Only available in the RG250H6N model.

Atmospheric Vent High Input

Residential Gas Water Heater

SPECIFICATIONS HIGH INPUT MODELS

Natural Gas and Liquid Propane Gas

These water heaters meet or exceed all or portions of (where applicable) the minimum efficiency requirements of ASHRAE Standard 90.1 (latest edition).

For Propane (LP) models change suffix "N" to "X".

For 10 year models, change suffix from "6" to "10" (Not available on RG255H6N).

*Based on rated recovery efficiency.

Uniform Energy Factor and First Hour Rating is based on the latest AHRI directory listings.

GENERAL:

All gas water heaters are certified at 300 PSI test pressure (2068 kPa) and 150 PSI working pressure (1034 kPa). All gas connections are 1/2" (13mm). All models design-certified by CSA International (formerly AGA/CGA), ANSI Z21.10.3 and peak performance rated (except RG250H6N = ANSI Z21.10.1).

Suitable for Water (Potable) Heating and Space Heating. Toxic chemicals, such as those used for boiler treatment, shall NEVER be introduced into this system. This unit may NEVER be connected to any existing heating system or component(s) previously used with a non-potable water heating appliance.

Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement.
